Education

University of Pennsylvania

Philadelphia, PA

MS, Mechanical Engineering and Applied Mechanics (**GPA: 4.0/4.0**) *January 2025 - May 2027*

BS, Mechanical Engineering and Applied Mechanics (**GPA: 4.0/4.0**) *August 2023 - May 2027*

- Minors: Engineering Entrepreneurship, Math
- Activities: Tau Beta Pi (Engineering Honors Society), Y-Prize Start-Up Competition, Penn Jet Propulsion, American Society of Mechanical Engineers, Wharton Undergraduate Aerospace Club

Experiences

SpaceX

Bastrop, TX

Starlink PCB Production Engineering Intern

May 2025 - August 2025

- Implemented a \$600k drill bit resharpener system and designed a \$100k automation cell to completely automate the process that can generate \$5.5M in annual savings on drill bits
- Collaborated with specialists and vendors to place, install, and perform quality tests for new drill room manufacturing equipment that will help more than 2x current PCB panel output capacity
- Integrated air knives, cleaning rollers, UV lights, and 3 enclosures throughout the manufacturing line to reduce foreign object debris, helping contribute to a 21% yield increase in 12 weeks

Modular Robotics Lab - NASA Lunar Surface Technology Research

Philadelphia, PA

Undergraduate Student Researcher

September 2023 - May 2025

- Worked with \$2 million NASA Lunar Surface Technology Research grant to design and test novel lunar technologies to facilitate linkages between robots to safely traverse hazardous terrains and overcome entrapment on moon using SolidWorks, rapid prototyping, and metal machining
- Built rigid, extendable arms with a docking mechanism, 5 meter reach, and 10:1 strength-to-weight ratio, allowing robots to apply 200N pushing and 300N pulling forces to each other

DPA Components International

Simi Valley, CA

Engineering Intern

May 2024 - August 2024

- Created CAD models and engineering drawings using SolidWorks for custom fixtures to integrate electronic components to test machines, enhancing the efficiency and accuracy of electrical tests
- Performed destructive physical analysis and electrical tests on 5,000+ micro electronic devices to determine temperature, shear stress, and gravitational force limits the parts can reliably function

Boeing

Huntington Beach, CA

Mechanical Design and Analysis Intern

June 2022 - August 2022

- Led team of 4 in design of satellite and mission to analyze the geology and chemistry of Europa, Jupiter's 4th moon, to determine its potential to support life and drive key astrobiology insights
- Constructed detailed reports, calculations, and CAD models for spacecraft's ideal launch vehicle, trajectory, thermal control, budget, timeline, command and data handling, and computer system

Skills

- Technical: CAD (SolidWorks), Rapid Prototyping (Laser Cutting, 3D Print), Machining (Metal, Wood), FEA (SolidWorks), CFD (COMSOL), Circuits, Python, MatLab, Data Analysis
